REAL WORLD SMART
CHATBOT FOR
CUSTOMER CARE
USING A SOFTWARE
AS A SERVICE (SAAS)
ARCHITECTURE

This journal employ chatbot for customer care. This is done by providing a human way interaction using LUIS and cognitive services.

- AWS Public Cloud
- AWS Lambda
- API Gateway
- LUIS
- Ejabberd Chatbot

- Cloud Computing
- Machine Learning

This proposes a robust, scalable, and extensible architecture with a technology stack consisting of the EjabberdServer.

The Ejabberd server makes creates the roomfunctionality where the customer needs to be persistent over time in that room

IMPLEMENTING
CONTINUOUS
CUSTOMER CARE

In this paper, we employ the software as a service (SaaS) which model introduces drastic the improvement to situation, as the service provider can now have direct access to the user data and analyze it if agreed appropriately with the customer.

- Java Script
- HTML
- Google Analytics

- Cloud Computing
- Machine Learning
- 1. Feedback loops are used that allow the service provider to capture feedback at the point of experience. One way to find out is to conduct continual end-user experience monitoring to determine if users are happy
- 2. It is not always easy for SaaS providers to know what customers are experiencing.
